

Settlements - Summary

The **Settlements** tab in cairo.BI is a **tool for monitoring the company's receivables and liabilities**. It enables **full control over payments** and **helps assess their impact on the company's financial liquidity**.

In this tab, users can analyze, among other things:

- **receivables and liabilities balance** - the company's current financial balance,
- **overdue items** - breakdown of settlements by delay periods,
- **payment schedule** - forecast of future receivables and liabilities over time,
- **settlements by contractors** - analysis showing which business partners generate the largest receivables and liabilities,
- **settlements by currencies** - control of balances in PLN, EUR, USD, and other currencies,
- **settlements by settlement groups** - overview of settlements within defined categories.

The **Settlements** tab in cairo.BI allows for quick identification of potential risks related to payment delays and assessment of the company's financial stability. It is a key tool supporting liquidity management and strategic financial decision-making.

All values are converted to PLN according to the **exchange rate of the previous day**, ensuring consistent presentation regardless of the document currency.

Unsettled receivables 1 176 249,51 PLN	Overdue receivables 132 922,37 PLN
Unsettled liabilities -10 220 676,00 PLN	Overdue liabilities -16 284,59 PLN
Balance -9 044 426,49 PLN	Overdue balance 116 637,78 PLN

The section presents the **key values of receivables and liabilities in a general view**. It shows both current and overdue amounts.

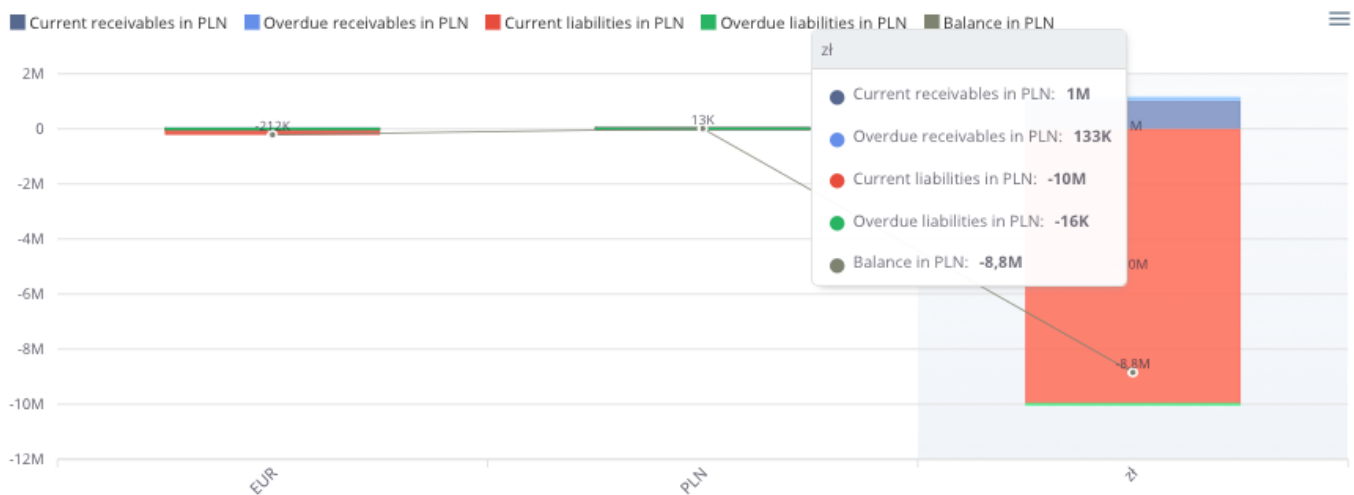

The visible fields are:

- **Unsettled receivables** – the current value of receivables from contractors that have not yet been paid.
- **Overdue receivables** – the portion of receivables for which the payment deadline has been exceeded.
- **Unsettled liabilities** – the company’s current obligations that have not yet been settled.
- **Overdue liabilities** – liabilities for which the payment deadline has passed.
- **Balance** – the difference between unsettled receivables and liabilities.
- **Overdue balance** – the difference between receivables and liabilities, taking into account only overdue amounts.

Thanks to this section, the user can quickly **assess the current state of settlements** and determine whether the company currently has a **surplus of receivables or liabilities**.

Unsettled by currencies

Unsettled by currencies

“Unsettled by currencies” – the chart presents the **value of unsettled receivables and liabilities broken down by currency**.

The following elements are visible:

- **Current receivables in PLN** – amounts for which the payment due date has not yet passed,
- **Overdue receivables in PLN** – amounts past their payment due date,
- **Current liabilities in PLN** – amounts payable to suppliers before the due date,
- **Overdue liabilities in PLN** – amounts past their payment due date,
- **Balance in PLN** – the difference between receivables and liabilities in a given currency.

Summary						1 176 249,51 PLN	132 922,37 PLN	-10 220 676,00 PLN	-16 284,59 PLN	-9 044 426,49 PLN

“Unsettled values by currencies - table” - this summary presents **receivables and liabilities broken down by individual currencies**. For each currency, the following data is displayed:

- **Currency** - Indicates the currency in which the settlements are recorded.
- **Receivables** - Displays the total current value of receivables in the specified currency.
- **including overdue** - The portion of receivables that has exceeded the payment due date.
- **Liabilities** - Displays the total current value of liabilities in the specified currency.
- **including overdue** - The portion of liabilities that has exceeded the payment due date.
- **Balance in currency** - The net difference between total receivables and total liabilities for that currency.
- **Receivables in PLN** - The total value of receivables converted into PLN.
- **including overdue** - The value of overdue receivables converted into PLN.
- **Liabilities in PLN** - The total value of liabilities converted into PLN.
- **including overdue** - The value of overdue liabilities converted into PLN.
- **Balance in PLN** - The final financial balance for the specific currency, converted into PLN.

The table uses **color highlighting**:

- **Red bar** - its length reflects the volume of liabilities; the longer the bar, the higher the total amount payable.
- **Grey bar** - its length corresponds to the volume of receivables; the longer the bar, the higher the total amount due.

This allows the user to quickly assess not only numerical values but also **the proportions between receivables and liabilities in each currency**, as well as the **impact of delays on the balance**.

The table includes a **search field**, which allows narrowing the data to selected currencies. In such cases, **summaries automatically adjust** to the filtered results.

Additionally, data can be **sorted by clicking column headers** - for example, to arrange currencies by the amount of receivables, liabilities, or balance.
