

Warehouse - Warehouse values by producers

Value by producers - Top 100

“Value by producers - Top 100” – the chart presents the **100 producers with the highest warehouse stock value**.

Each rectangle represents one manufacturer:

- **the size of the field** reflects the stock value assigned to that manufacturer,
- **the color** distinguishes individual manufacturers from one another.

Thanks to this visualization, it is easy to identify **which manufacturers account for the largest share of total warehouse value** and to compare their **percentage contribution** within the overall stock structure.

Value by producers - table

Value by producers

Producer	Value	Available	% Avail.	Log. res.	% Log. res.	Client res.	% Res.	% Whse.
BRAK	15 803 725,43 PLN	15 286 477,52 PLN	96,73%	392 950,28 PLN	2,49%	124 298,31 PLN	0,79%	100,00%
FAG	538,61 PLN	538,61 PLN	100,00%	0,00 PLN	0,00%	0,00 PLN	0,00%	0,00%
ORIGINAL IMPERIUM	18,76 PLN	18,76 PLN	100,00%	0,00 PLN	0,00%	0,00 PLN	0,00%	0,00%
Summary	15 804 282,80 PLN	15 287 034,89 PLN	96,73%	392 950,28 PLN	2,49%	124 298,31 PLN	0,79%	

“Value by producers - table” – this summary presents **stock values broken down by individual producers**. For each manufacturer, the following data is displayed:

- **Value**,
- **Available value** and its percentage share (**% Avail.**),
- **Logistics reservations value** with its percentage share (**% Log.res.**),
- **Client reservations value** with its percentage share (**% Res.**),
- **Producer's percentage share** in total warehouse stock (**% Whse.**).

The table uses **color highlighting** for easier interpretation:

- **Green** - the more intense the color, the higher the share of goods available for sale,
- **Red** - the more intense the color, the greater the share of goods blocked in logistics or customer reservations.

This allows the user to quickly assess not only numerical values but also **the proportions between available and reserved stock** for each manufacturer.

The table includes a **search field** that allows narrowing the data to selected manufacturers. In such cases, **summaries automatically adjust to the filtered results**.

Additionally, data can be **sorted by clicking column headers** - for example, to arrange manufacturers by total value or by the percentage share of reservations.
